Experience

Software Engineer Intern

SAP Product and Innovation

Aug 2017 - Present

Singapore

Worked on SAP's Mobile Development Kit (MDK) - a metadata-driven framework for rapid mobile development, built on top of NativeScript, SAP Cloud Platform SDK for iOS.

Helped building SAP Asset Manager - an enterprise application built using SAP MDK

About SAP MDK: blogs.sap.com/2017/05/24/sap-enterprise-app-modeler

Fullstack Engineer Intern

Sea Group (formerly Garena)

May 2017 - Aug 2017

Singapore

Developed Transify - a system where managers, developers, and translators administer the company's core products including Garena, Shopee, and Airpay for language translations.

Tools used: React Redux, Redux-Saga, ImmutableJS, Django REST, NGINX, uWSGI, MySQL

Web Developer Intern

Pinnacle Investment

May 2016 - July 2016

Jakarta, Indonesia

Designed and developed company's corporate website from scratch until deployment, with administrator access and content management capabilities using PHP.

Worked closely with company's Board of Directors for rebranding strategy - produced logo for the company's ETFs and carried out several design related projects.
